

# Docker on FIWARE User Guide

- [Introduction](#)

## Introduction

This project is part of [FIWARE](#). Check also the [FIWARE Catalogue entry for Docker](#).

This user and programming guide will explain how run Docker on the fiware cloud. Since, FIWARE exposes the docker api you can use any docker client to remotely manage docker.

The [docker installation guide](#) describes how to install docker hosts on FIWARE using [Docker Machine](#). Once installed you can use your docker client to work with the docker hosts.

The [docker user guide](#) describes how to user docker.
